EDUCATION

Tehnoloska Skola

May 2025

Relevant Courses: Graphic Design Fundamentals, Print Technology, Typography, Digital Prepress, Color Theory, Desktop Publishing

COURSES & CERTIFICATIONS

React – Next.js & Redux Advanced Course (Maximilian Schwarzmüller)

Web Development Bootcamp 2026 (Colt Steele)

UI/UX Design in Figma (Inkyy Academy)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Technologies: Docker, Git, Vercel, VS Code

Frontend: React.js, Next.js, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io

Databases: PostgreSQL, Prisma ORM, Supabase, MongoDB, Mongoose

Payments: Stripe

Design: Figma, Adobe Photoshop, Adobe Illustrator

EXPERIENCE

Web Developer | Self Employed

May 2026 - Present

Freelance

- Developed responsive web applications using React.js and Next.js
- Built an e-commerce webshop with product listing, cart functionality and dynamic routing
- Implemented REST API integration and state management for frontend logic
- Designed UI layouts and components using Tailwind CSS and Figma
- Optimized user experience with mobile-first and responsive design principles
- Managed project version control using Git and GitHub

UI/UX Designer

May 2024 - Present

Freelance

- Designed user interfaces for web and mobile applications using Figma
- Created wireframes, user flows and high-fidelity mockups for multiple project concepts
- Applied UI/UX principles including spacing, typography, color systems and visual hierarchy
- Developed responsive design layouts optimized for desktop and mobile screens
- Collaborated on improving user experience through iterative design and feedback
- Prepared design assets and prototypes for developer handoff

Apprenticeship

- Assisted in designing and structuring responsive website layouts for web projects
- Created UI mockups and page designs using Figma
- Focused on usability, visual hierarchy, and modern web design principles
- Collaborated on improving design consistency across multiple pages and components
- Translated design concepts into developer-ready layouts
- Gained hands-on experience with real project workflows and feedback cycles
- Evaluated and presented findings and recommendations for data infrastructure optimization to senior VPs

Print Shop Assistant | Graphic Design & Print Production**Sep 2022 - July 2024***Internship*

- Assisted in preparing print-ready files for production (flyers, posters, brochures)
- Created and edited visual designs using Adobe Photoshop and Illustrator
- Applied typography, layout composition and color theory in print materials
- Supported prepress workflow including file formatting, resolution checks and export settings
- Collaborated with print production team to ensure design accuracy and quality standards
- Gained hands-on experience in real print production environment and deadlines

PROJECTS

Gemora | Real-Time Auction Platform*React, Express.js, Socket.io, PostgreSQL, Prisma, JWT, Tailwind***Live:** gemora-auction-house-client-3iod.vercel.app/Frontend: github.com/itsmilos/gemora-auction-house-clientBackend: github.com/itsmilos/gemora-auction-house-server**July 2026**

- Developed a full-stack real-time auction platform with live bidding functionality using React and Socket.io
- Built REST APIs with Express.js for auction management, authentication and bidding logic
- Implemented JWT authentication and protected routes with role-based authorization
- Created real-time bidding updates using Socket.io rooms
- Used Prisma ORM with PostgreSQL for database management

SentinelGear | Tactical Store E-Commerce*Next.js, Stripe, PostgreSQL, Tailwind***Live:** sentinel-gear-tacticalstore.vercel.app/Github: github.com/itsmilos/SentinelGear-tacticalstore.git**June 2026**

- Developed a full-stack e-commerce platform for tactical gear products using Next.js
- Implemented secure Stripe payment integration for checkout and order processing
- Built dynamic product pages, cart system and responsive shopping experience
- Designed modern UI with Tailwind CSS focusing on usability and performance
- Integrated backend logic for product management and order flow

Lume Studio | Booking SaaS

Next.js, MongoDB, Tailwind

Live: <https://lume-studio-ashen.vercel.app/>

Github: github.com/itsmilos/lume-studio-app.git

May 2026

- Built a booking system SaaS for a beauty studio with scheduling functionality
- Implemented appointment creation, availability logic and user booking flow
- Designed responsive interface optimized for mobile-first user experience
- Structured application architecture using reusable components and clean state management
- Focused on UX flow optimization for fast and intuitive booking process
